

Title

- suggest to change from [... cardiomyopathy : a retrospective study] to [...cardiomyopathy : a retrospective cohort study.]

Abstract:

- in Methods please add 2-3 more sentences to describe the variables and statistical analysis used

Main article:

- start this sentence as new paragraph [The ratio of lymphocyte to monocyte, namely, LMR, has been reported to be significantly associated with the prognosis of various malignancies [11] and card]
- Line 74: Write as [This is a retrospective cohort study where all HCM patients greater than 18 years of age]
- Remove the white space between Line 180 and 182

Table 2

- Standardize the reporting of change and HR.
- Remove NONE, for example:

Procedures

- | | | |
|---------------------------|---------------------------------|--------|
| - Alcohol septal ablation | Alcohol septal ablation vs none | 0.50() |
| - Septal myectomy | Septal myectomy vs none | 1.63() |

Devices

- | | | |
|-------------|-------------------|--------|
| - Pacemaker | Pacemaker vs none | 1.60() |
