

Dear PeerJ,

Please find attached a revised version of the manuscript [Malaria prevalence and incidence in an isolated, meso-endemic area of Mozambique](#). As requested we have shortened the abstract and have added a 'Conclusions' paragraph to the paper. We have also revised the English (you will see that people now brought their children to the clinic rather than bought them there).

We would like to take this opportunity to thank the referees for their comments on the original submission which helped us to greatly improve the manuscript,

Regards,

Derek Charlwood for the authors.
