

REVIEW FOR PEERJ

I work on a topic relevant to the research area, presenting good methodology and good results, which can contribute as a source of more information about the studied problem. As a suggestion for improvement, here are some recommendations:

- Some KEYWORDS are repeated in the TITLE, which is not adequate, as it limits the search for your possible future article by other researchers. I advise you to change the keywords to others that are not contained in the TITLE.

- Text with very long paragraphs, which sometimes even discourages reading. There is a paragraph of almost a page. I advise better to distribute them.

- There are spelling errors, clearly evidenced, on line 214, by the word “concentration”.

- The topic RESULTS and the topic DISCUSSION present some repetitive information. This is because the author made some discussions in the RESULTS topic, including citing BIBLIOGRAPHICAL REFERENCES. Therefore, I suggest that you better adapt the topics.

- The CONCLUSION topic is not as direct as it should be, it seems more like “Final Considerations”. There is, for example, even an explanation of the methodology in this topic. I advise simplifying more and being more direct with what was concluded with the research.
