

Title: An investigation of the pigments, antioxidants and free radical scavenging potential of medicinal weeds

Thank you very much for sharing your article to review. My comments are below-

A. Abstract

Should be rewritten focusing Background, methods, results, and conclusions.

B. Introduction

Discuss about your research questions. Why your work is important. What is the lacking will full-fill your research.

C. Do you have HPLC data for the analysis of phytochemicals from leaves and steam extract? For the exact information these data are very important.

Line 125-Materials & Methods

Sampling and data collection

1. How do you extract from plant leaves and steam? Did you sun dry? Did you make powder? Which solvent did you use to extract? Explain precisely.
2. Clearly write the data availability section

Figure 1

Increase the front size for better visibility

Figure 2

1. Increase the front of leaf and steam indication box
2. Write the meaning of small a, b, c... etc.
3. Indicate the statistics on the graph appropriately

Figure 3

Same comments as Figure 2

Figure 4

Make the figure B-H are unique. Add statistics to each graph

Figure 5

Make the figure B-H are unique. Add statistics to each graph
