1	BACKGROUND	45-103	- In general, Background of this manuscript is too long. - The background should help the reader understand why the study is important. - The authors should explain why the study is being carried out with clear rationale. - The authors should explain the differ of this study from other work
		99-100	The authors wrote: *The primary objective of this review was to comprehensively assess the existing literature on the application of silver diamine fluoride (SDF) as a treatment modality for enamel caries.* In background we could not find the reason why the authors focused the study only for enamel caries.
2	MAIN BODY		1. In general, this parts is too long, it is better to shorten the explanation of reference used 2. It is better to explain the mechanism of action of SDF in the beginning of this part 3. The authors just wrote what other authors have written. The authors should interpreting, critiquing and analysing their ideas
3	FIGURE		Figure 1: The Figure is confusing. - In the top of Figure 1: "SILVER DIAMINE FLUORIDE" Why? This diagram is about the effect of fluoride, silver nitrate and silver diamine, not just talking about SDF. - The effect of fluoride, silver nitrate and silver diamine is not clear in that diagram. - Explanation of diagram C: not complete. Please check
