

Dear Editor, the requested revisions have been made, but I have some small suggestions to strengthen the article and make it more cited. Especially in the Introduction and the definition of the Elements, I still have concerns about the references and strengthening the article, so I will suggest a few article references (if possible, from the last 5 years). I think that the authors will improve the article after reading it quickly and citing it.

Example; Toxic heavy metals such as Chromium (Cr), Arsenic (As), Cadmium (Cd), Mercury (Hg), and Lead (Pb) have been identified as priority pollutants due to their high degree of toxicity and widespread presence in the environment (Balali-Mood et al. 2021; XXX el at., 2024; XXX)
