

Reviewer Comments

Journal: PeerJ Computer Science

Manuscript Title: A computer architecture based on disruptive information technologies for drug management in hospitals

Manuscript ID: PeerJ-82436v2

Submission Date: Wednesday, May 17, 2023

The authors have considered most of the raised comment in their updated manuscript. However, there are some comments need to be considered:

Overall Comments:

- (1) Figure 3 is not written in English.
- (2) Figure 1 need to be expoerted well as an image as the red line below the text should be removed.
- (3) The captions need to be enhanced. More details should be added.
- (4) The captions of tables should be added before them not after.
- (5) The abstract should be handled as a single paragraph. Remove the new lines between them.
- (6) Move the limitations section before the conclusions.

For the authors in case of the authors got a chance to review the manuscript and submit the revised one after the editor's decision, please, provide a table in the revised manuscript mentioning (1) the comment, (2) the authors' response, and (3) the authors' change (if applicable). Please, consider all of the comments and don't ignore any of them.

*Please, refer to the attached file "**PeerJ-82436v2 Reviewer.pdf**" for the same comments in an organized format.*
