

The abstract and the introduction has enormously improved.

However, in other section there will be some query and improvement needed:

- 1) Give sufficient related work about Zemberek Model.
- 2) What is the summary for the related works the author has studied.
- 3) At line 160 and 169 – citation is not completed

How the method of feature extraction and Hyper-Parameter Optimization work in the phase of the project? how the methods works in terms of flow chart or mathematical formulation with explanation.

In order to support your validity if finding, at line 429-436, show the similarity and the different among the related researcher and discuss it in summary.

In order to support the result in Table 1, show the meaning of the result such as discussion and interpretation the results/finding that reflect to the article's aim.

The discussion section described by recapping the material and method and slightly brief touch the finding based material and method used in the study.

The article can be accepted with minor revisions.
