

1. Basic reporting

1. Presentation of the manuscript is excellent

2. The Diagrams presented by the authors are nice per the journal perspective requirement.

3. The literature review is not up to mark. The authors are advised to review the mentioned articles to enhance the quality of the article.

a. 10.4108/eai.19-12-2018.156086

b. 10.1109/ICICCSP53532.2022.9862419

c. 10.2174/2666145416666230124143912

d. 10.1109/ESCI56872.2023.10100310

4. Dataset description is missing in the manuscript even if the authors added it as supplementary data.

2. Experimental design

1. Why the authors have chosen GA or outlier detection? Why not use another approach? The complexity of GA is high. Address this issue.

2. Why do the authors show interest in the Tiki-Taka Algorithm? Nowhere in the manuscript a detailed description of the importance of this algorithm is mentioned.

3. Validity of the findings

1. The ROC Curve presentation should be included in the result analysis.

2. Why did the authors use only the NB classifier? Whether they have tried and compared with others. if yes, why not mention it in the manuscript?

3. It is advisable to compare with any two classifiers.

4. Result analysis not done properly. Add the accuracy achieved (proposed vs existing)

5. Which existing model is compared mention clearly?

6. Whether the compared articles used same dataaset? Clarity needed.
