

Manuscript ID 109415v1

This paper is related to reviewing the manuscript titled "**Deep ensemble learning for Gastrointestinal diagnosis using endoscopic image classification**"

This research proposes a deep ensemble model leveraging transfer learning for accurate classification of GIT disorders in endoscopic images, focusing on identifying and classifying diseased regions.

Firstly, the presented study is successful in terms of good literature research and evaluation results.

- 1) Use abbreviations after the first use in the text, in the abstract and throughout the paper.
- 2) The conclusion section really needs to be improved
- 3) The resolution of the figures giving should be increased.
- 4) Clean the paper of English spelling and punctuation errors

My decision is minor revision. I would like to inform you that if all the requested items are not completed in this revision, my decision will be to reject the application in the second round. Otherwise, I do not see any harm in publishing the manuscript once the above revisions are made.

Best regards.
